

## Induction

### *Worksafe Procedure*

May 2023

# Working Safely

- ▶ Nothing is more important than your safety, that of your colleagues, our customers, the community and other contractors.
- ▶ There are lots of “defences in depth” to ensure this.

# Ways of Raising Concerns

- ▶ Your first contact should always be your supervisor or line manager.
- ▶ You can raise a Close Call using the SWGR app.
- ▶ If you have raised a concern but it hasn't been dealt with, you can report it to CIRAS at 0800 4 101 101.
- ▶ But what should you do if you genuinely believe that there is an imminent risk to your or others, health or safety on site?

# “Worksafe”

- ▶ If you genuinely believe that there is an imminent risk to your or others' health or safety report it to the person in charge on site.
- ▶ Work should be paused and the safety arrangements reviewed.
- ▶ If you are still worried, contact SWGR Control, explain the problem and say that you are invoking the “Worksafe” procedure.
- ▶ The safety arrangements will be reviewed again.
- ▶ You will not be penalised for invoking Worksafe in good faith.
